At first there is a tired feeling in the legs, then dragging the leg, scraping the floor, tendency to fall, all appear insidiously. Increase of the reflexes, ankle-clonus, toe-phenomenon accompany the spasticity. Ataxia of station, of movements, loss of the sense of position are all present. While a gradual development of these symptoms leading to incapacity is the rule, nevertheless in exceptional cases sudden exacerbations occur, also in some cases remissions in the course of the paralysis have been observed. Another interesting feature of the disease under discussion is that in spite of its progressive course, before complete impotence of the affected limbs takes place there is in the majority of cases a change of spasticity to flaccidity with diminution or abolition of the abnormal reflexes except the toe-phenomenon. In exceptional cases this change...
