

Popular Astronomy Volume 4

By Carleton College Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1897 Excerpt: .So permanently visible are they that I have been able to construct the accompanying map of the only hemisphere Venus can ever show us. The relative absence of markings on the left side of the map simply means that during the observations that side was not favorably presented, the extreme edge not having been presented at all, as the observations began when the phase angle was 17. The most instantly curious phenomenon about the markings is that a great many of them are of the general nature of broadish lines radiating from a certain point in longitude 37 and north latitude 8. Curious as this character and distribution appears to be, the look of the whole is natural. There is nothing about Oct. 23 23h 36 --43m Oct. 25 3h 45m Oct. 25 4h 2m--11TM Venus. Drawn by Percival Lowell, Lowell Observatory, Oct., 1896. Popular Astronomy,...
